

The CNMRA is pleased to announce the formation of a Technical Directors committee to oversee the application of technical rules and regulations during CNMRA events. This formation was brought forward in response to queries from competitors regarding individual machine classification suitability, machine class requirements and general technical questions regarding all aspects of competition.

There are three technical directors, one from each province currently competing in CNMRA events. Any competitors requiring information or rulings regarding technical issues should contact any or all of the technical directors in writing. The directors will also be present at the CNMRA events and can be approached for information.

The directors are:

Devon Edie	Saskatoon, SK	<a href="mailto:finnspad@sasktel.net">finnspad@sasktel.net</a>
Ian McWhirter	Calgary, Alta	<a href="mailto:mcwhclan@telusplanet.net">mcwhclan@telusplanet.net</a>
Fred Schinz	Prince George, B.C.	<a href="mailto:tzed.racing@telus.net">tzed.racing@telus.net</a>

For any questions or rulings regarding application of technical requirements your contact will be the technical directors, not the race directors, starters or the administration and timing staff. They most likely to busy or not able to properly answer your questions.
